Overview of the report
Summary on the report

Strong points

- Simple methods
- Explanations of theory
- Determination ...

Weak points

- Wrong assumption of the role of iron in the oxidation process
- Insufficient science of method
- No clear explanations for dependencies
Points for discussion

- Accuracy of the method
- 0.5-2.2 mg iron in 100g apples
- Large error of measurement
- Calculation of results
- Other methods to confirm the results
Summary
Thank you for attention!
