

The 8th International Young Naturalists' Tournament

Opposition to the problem №8

Taisia Kashintseva

Team «Element»

Russia, Novosibirsk

[*chnmk@mail.ru*](mailto:chnmk@mail.ru)

Strength sides

Analysis of available data

Photo

More attention to experiments

Weak sides

Quality of the experimental part:

- Don't have error
- Don't have final quantitative parameters

different sizes of magnet

Don't have aim, predictions

Quality of theoretical research

- Incomprehensible formula

- Magnet characteristics

Technical level of the presentation

Analysis of the solution №8

Questions for discussion:

1. What is the difference between magnets?
