

*The 8<sup>th</sup> International Young Naturalists' Tournament*

# **Opposition to the problem № 26**

*Metel Daria*

*Team «Element»*

*Russia, Novosibirsk*

[chnmk@mail.ru](mailto:chnmk@mail.ru)

## Strength sides

**Technical level of the presentation**

**More attention to experiments**

**Quality of the experimental part:**

- Exhaled volume
- how vinegar was applied

**Photos**

**Quality of theoretical research**

**+Why is it happened**

+ condensation conditions

-what is condensation

## Weak sides

**Don't have aim, predictions**

There is no quantitative parameter

# Analysis of the solution №26

Questions for discussion:

1. Does the volume of exhaled air depend on the person's age?
