

# Opposition to the problem №9 «Bottle tone»

IYNT 2018

TEAM OF BELARUS

OPPONENT: MARIA ZHUIKO

# Problem statement

# The Reporter

## STRENGTHS

- Good theoretical model;
- Researched parameters:
  - Effective volume;
  - Length of the neck;

## WEAKNESSES

- Some parameters were not researched;
- Only frequency, nothing about the volume of the sound;
- No velocity, volume investigation

# The Opponent

## STRENGTHS

- Noticed affection of the mouth blowing (humidity);

## WEAKNESSES

- Didn't noticed some important points (diameter, shape, velocity)

# Discussion

- Discussion points were not visualized on the slide.
- Some missed points: volume of the sound, neck diameter

Thank you for attention!
