

# Opposition to the problem №5 «Collision»

IYNT 2018  
TEAM OF BELARUS  
OPPONENT: ALEXEY BORIS

# Theoretical part.

## STRENGTHS

- Theoretical model;
- Assumed parameters

## WEAKNESSES

- Slides were changed too fast;

# Experimental part.

## STRENGTHS

- Two different balls;
- Different set ups;

## WEAKNESSES

- Tables;

# Points for discussion.

- Collision energy conservations?
- Sound inaccuracies in oscillations?

Thank you for attention!

# Qualifying questions
